DETAILED ACTION

Response to Amendment

Claims 4-19 & 21-33 are pending in the application and claims 4-17 & 25-33 are withdrawn from consideration. Claims 18, 19 & 21-24 are pending examination.

Claim Rejections - 35 USC § 102/103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 18, 19 & 21-24 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as being unpatentable over US Patent 6,057,051 (Uchida).

Uchida describes a personal computer, which has a body having a display unit and a controller. A detachable fuel cell unit powers the computer and comprises a fuel cell, a fuel tank, a sensor for detecting the amount of fuel remaining and a control unit with a first storage unit (Fig. 1; 3:1-40, 7:39-54). The sensor detects the amount of fuel remaining and then the amount of operation time remaining is computed. The calculated remaining operating time information is sent to the electronic apparatus through a connection terminal so the electronic apparatus' equipment can display the information (Figs. 1 & 5; 7:39-54). The method disclosed for computing the amount of

Art Unit: 1795

remaining operating time uses mathematical computations. The information gathered and the computations made inherently require storing information from the sensors (7:43-46). The status of low fuel on the display unit would prompt one to replace the fuel in order to keep the apparatus working. A replaceable fuel tank supplies the fuel cell with the appropriate fuel (Figs. 2 & 3; 7:33-37). If no fuel tank is present then the sensor shows a low fuel status on the display, indicating a bad connection or no connection of the fuel tank to the apparatus. The electronic apparatus' equipment, like the personal computer exemplified, inherently has a second storage unit, such as memory and a processing unit (CPU), to operate the functions of the computer and fuel cell system, which include requesting the amount of fuel remaining, operating times and operating conditions from the fuel cell unit (7:39-60). For instance, a graphics card will have memory for processing the information that will be displayed on the monitor.

Concerning claim 24, the limitations are seen as a process of operating and while the limitations have been considered, they are not given patentable weight. The process of operating the apparatus does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
